Applicant Task

Brief

- Complete the task outlined below using Sketch.
  - *As outlined within the online details of the internship, you will need access to an Apple Mac or iMac in order to take part in the internship or work with us as an in house designer in any capacity. This is because Sketch is a fundamental software we use within our design team and it is only available for MacOS.*

- Create a Finder folder named "[Your Full Name] Design Internship Task]" and add your completed Sketch file and an export of your work.

- Send the folder to hello@yellow.build.

- Please note that there is no deadline for this task however we are reviewing and progressing applications on a rolling basis.

- We aim to review applications and get back to you within 1 week.

- We hope you enjoy completing this task & look forward to reviewing your work!

Task

- Replicate the Spotlas Home Screen PNG in Sketch.
  - *For clarity this means copy it to create a version that looks as similar to the screen as possible.*

Tips

- Optimise your use of Symbols.
- Utilise resizing so that the artboard can be resized to a variety of mobile screen sizes.
